

AUSTIN HINDERER

FRONT END DEVELOPER

austinhinderer.com

Employment

Amazon Web Services (2012-2015) Seattle, WA

Web Development Engineer II

Senior developer on the AWS Marketing Front End Development team. As senior member on team, I help direct work-flow for junior developers, perform code-reviews, and oversee interactions between multiple design and marketing teams. I also oversee building marketing websites, HTML email templates, supporting daily marketing operations, and advise the design team on search engine optimization and best practices for web asset creation. While at Amazon Web Services, I have lead the development of the HTML/CSS framework being used on the next generation of AWS websites. I have also lead the front end implementation of templates and components in an Adobe CQ powered CMS.

CrowdCompass Inc. (2011) Kirkland, WA

Online Marketing Manager

Developed and implemented marketing programs using websites, email, online advertising and promotions, and search-engine marketing (SEM/SEO). Developed a WordPress powered website with a responsive layout. Conceived strategies and tactics to raise rates of customer acquisition, retention, and cross/up-selling. While at CrowdCompass, I designed, implemented, and launched new company wide branding including designing and developing the website and trade show booths.

Intelius, Inc. (2011) Bellevue, WA

Web Developer

Onsite contract web developer position to assist a large team supporting several business-to-business and home user eCommerce websites. I gained experience with both the git version control system and the Mantis bug tracking system.

CBS Radio Network (2010) Seattle, WA

Web Designer

Filled a temporary position in a hybrid role that worked with both the content creation team and the sales department. I created 4 websites, 2 newsletter designs, and over 50 advertisements to be used on the websites of all four radio stations.

Visual Studios (2008-2010) Fairhaven, WA

Web Developer

General purpose web developer including CSS/HTML for several different websites and platforms. Through Visual Studios, I worked on several projects for local business and personal ventures.
